Show all steps:

ON

Problem

Compare and contrast the traditional design of a watch with that of the mechatronics-designed product involving a microprocessor.

Step-by-step solution

Step 1 of 2

Development in the field of mechatronics has led to many improvements over traditionally designed products. A traditionally designed watch can be compared with a mechatronics over a number of parameters.

Comment

Step 2 of 2

Below is the comparison of traditionally designed watch with a mechatronics designed watch.

	Traditionally Designed Watch	Mechatronics designed Watch
1	Construction is bulky	Construction is compact
2	It is less accurate	Accuracy is more
3	It requires rewinding	It does not require rewinding
4	Cost of manufacturing is more	Cost of manufacturing is less
5	More sensitive to environmental changes	Less affected due to environmental changes
6	It has limited number of functions	Number of functions is more
7	Mechanism of watch is complex	It has simple mechanism
